

Anleitung für den alvasys automation Frame

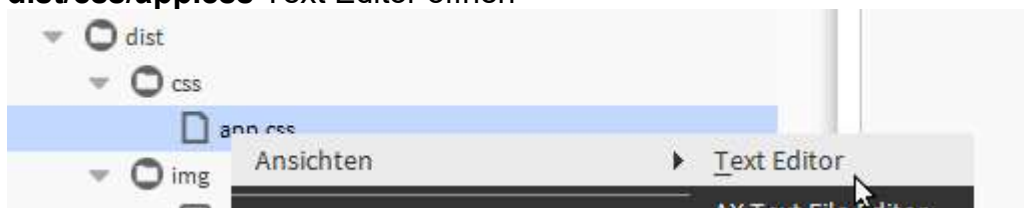

Ganzer Ordner bitte Enzippen und unter dem File System von dem JACE/MAC36/Supervisor ablegen

Frame_alvasys

Farbe des Frame kann hier bearbeitet werden:

dist/css/app.css Text Editor öffnen

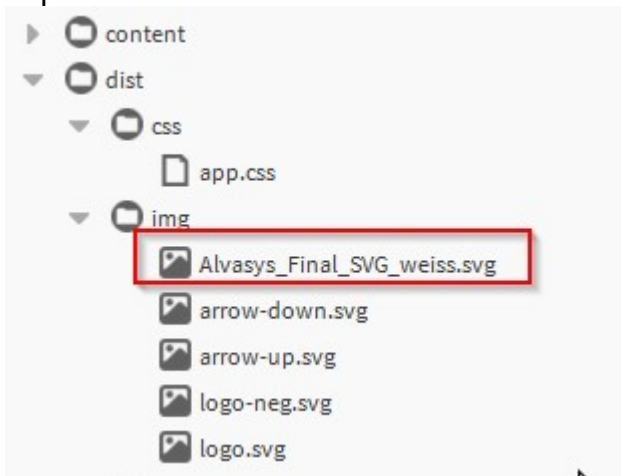

```

1 @import url(https://fonts.googleapis.com/css?family=Work+Sans:wght@400;500;600&display=swap);
2 body,html{margin:0;min-height:100%;padding:0}body{font-family:Work Sans,sans-serif;font-size:13px}ul li{display:block}#navxml{display:none}main{display:flex;height:100%;min-
3

```

Logo

Ablage des Files unter img am besten ein .svg so das sich das Grösse automatisch anpasst.

Im index.html Text Editor öffnen und das Verzeichnispfad noch angeben!

Namen der Seite! Kann auch angepasst werden:

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8" />
    <title>alvasys</title>
    <meta name="description" content="Alvasys Template" />
    <link rel="stylesheet" type="text/css" href="dist/css/app.css" />
    <link rel="preconnect" href="https://fonts.googleapis.com">
    <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
    <link href="https://fonts.googleapis.com/css2?family=Inter:wght@100;300;600&display=swap" rel="stylesheet">
  </head>
</html>
```

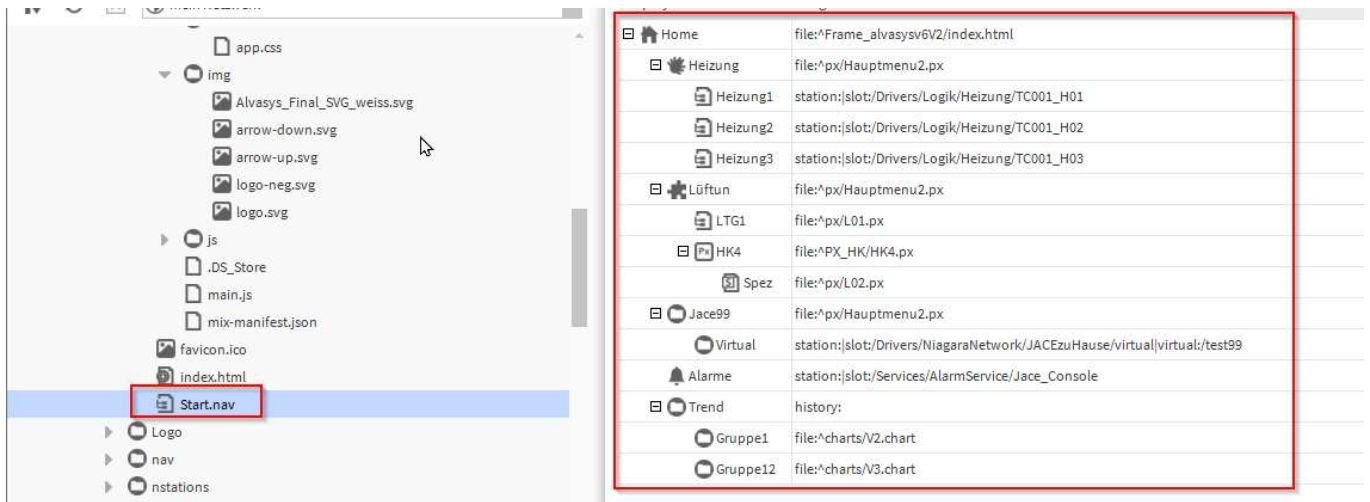

Startbild definieren:

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8" />
    <title>alvasys</title>
    <meta name="description" content="Alvasys Template" />
    <link rel="stylesheet" type="text/css" href="dist/css/app.css" />
    <link rel="preconnect" href="https://fonts.googleapis.com">
    <link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
    <link href="https://fonts.googleapis.com/css2?family=Inter:wght@100;300;600&display=swap" rel="stylesheet">
  </head>
  <body>
    <main>
      <section class="sidebar">
        <div class="menu-icon sidebar-toggle"></div>
        <div class="menu-slider sidebar-toggle"><span>&#8592</span></div>
        <div class="logo">
          
        </div>
        <nav id="nav">
          <ul>
            <li>
              <a href="content/home.html" target="main">Home</a>
            </li>
            <li>
              <a href="content/demol.html" target="main">Lüftung</a>
              <ul>
                <li><a href="content/demol.html" target="main">Muster1</a></li>
                <li>
                  <a href="content/demol.html" target="main">Muster2</a>
                  <ul>
                    <li><a href="content/demol.html" target="main">Muster Sub 1</a></li>
                  </ul>
                </li>
                <li><a href="content/demol.html" target="main">Muster3</a></li>
              </ul>
            </li>
            <li>
              <a href="content/demol.html" target="main">Sanitär</a>
              <ul>
                <li><a href="content/demol.html" target="main">Muster1</a></li>
              </ul>
            </li>
            <li>
              <a href="content/demol.html" target="main">Elektro</a>
              <ul>
                <li><a href="content/demol.html" target="main">Muster1</a></li>
              </ul>
            </li>
          </ul>
        </nav>
      </section>
      <iframe src="file:^px/Hauptmenu2.px" frameborder="0" name="main"></iframe>
    </main>
  </body>
</html>
```

Navigationsfile!

Kann im Nav File gemacht werden wie gewohnt im Niagara.

Wenn das Nav File Fertig ist diese Datei mit dem Texteditor öffnen:

+41 (0)44 261 00 70 info@alvasys.ch / www.alvasys.ch / www.alvasys.de

alvasys automation ag / Hermeschloosstrasse 75 / CH-8048 Zürich

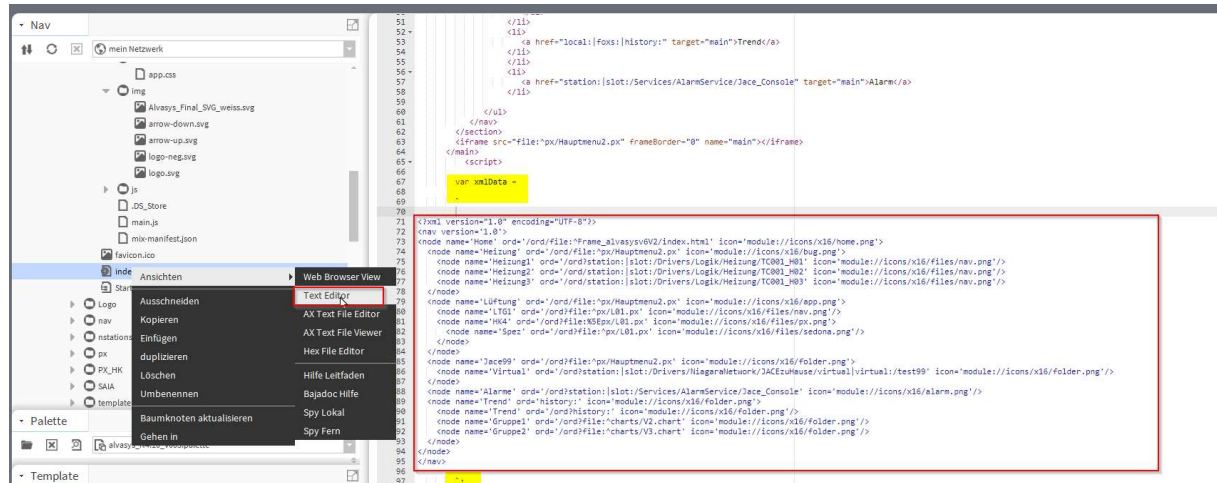

Inhalt kopieren!

Diesen Inhalt im index.html reinkopieren:
`var xmlData =`

Nav File muss da rein! (wenn es kein Inhalt drin hat dann übernimmt das Frame oben wo manuell rein geschrieben wird!
`;`

(Zur Info, wenn nichts oder was Ungültiges im Nav File drin ist, übernimmt das System die Manuellen Einträge oben.

```

</head>
<body>
  <main>
    <section class="sidebar">
      <div class="menu-icon sidebar-toggle"></div>
      <div class="menu-silder sidebar-toggle" span="88592"></div>
      <div class="logo">
        
      </div>
      <nav id="nav">
        <ul>
          <li>
            <a href="content/home.html" target="main">Home</a>
          </li>
          <li>
            <a href="content/demo1.html" target="main">Lüftung</a>
          </li>
          <li>
            <a href="content/demo1.html" target="main">Muster1</li>
            <ul>
              <li>
                <a href="content/demo1.html" target="main">Muster 2</a>
              </li>
              <li>
                <a href="content/demo1.html" target="main">Muster Sub 1</li>
              </li>
            </ul>
          </li>
          <li>
            <a href="content/demo1.html" target="main">Muster3</li>

        </ul>
      </nav>
    </section>
    <iframe src="file:px/Hauptmenu2.px" frameBorder="0" name="main"></iframe>
  </main>

```

Start Nav bitte an den User zuweisen + das richtige Web Profil einsetzen:
Handheld HX Profile

Nav File	file:^Frame_alvasysv6V2/Start.nav
Prototype Name	
Network User	aus
Cell Phone Number	
Authentication Scheme Name	DigestScheme
Roles	admin
Allow Concurrent Sessions	ein
Auto Logoff Settings	Auto Logoff Enabled: ein
	Use Default Auto Logoff Period: ein
	Auto Logoff Period: 00000h 15m
WEB Profil	Type: Handheld Hx Profile
	Hx Theme: Zebra
Mobile Web Profile	Mobile Nav File: file:^Frame_alvasysv6V2/Start.nav
	Type: Handheld Hx Profile
	Hx Theme: Zebra

Wie sieht es am Schuss aus:
